## INSTALLATION INFORMATION EMG MODEL: B348 3-POSITION NA TOGGLE

B348

### GENERAL INFORMATION:

The B348 is a sturdy and compact 3-position selection switch designed with an American-made ElectroSwitch toggle. It incorporates EMG's Solderless Connectors. It features a .468 (12mm) tall threaded bushing so it can be installed on an instrument with or without a pickguard. Its low profile can fit just about any guitar with a thin or thick body. It uses EMG's "BNOG" connector arrangement and includes cables for easy connection to EMG's solderless buss. The B348 includes both 17 inch and 6 inch cable lengths. Simply plug on the connectors and you're ready to go. See Page 2 for instructions on how to reverse the behavior of your switch, if necessary. Black, Ivory, and White toggles caps are available.

### B348 3-POS NA TOGGLE

### INSTALLATION:

B348 Selection Switch

The "BNOG" scheme is as follows:

- B= Bridge Pickup input (White wire)
- N= Neck Pickup input (Red wire)
- O= Output of Switch (Green wire)
- G= Ground (Black wire)

Install the 4 pin Connector housing on the switch as shown in the diagram to the right. Install the 2 separate 2 pin connectors on to the 4 pin connector between the black and red housings as shown. The black and green terminal blocks will not be used for the switch.

#### If the switch works **backwards**?

Simply reverse the connector that has the RED and WHITE wires and re-insert the plug as shown below.

Reverse this connector to make the switch work in the opposite direction

### WARRANTY

All EMG Pickups and accessories are warranted for a period of two years. This warranty does not cover failure due to improper installation, abuse or damage. If upon examination the pickup is determined to be defective, a replacement will be made. Warranty replacement products are covered by this same warranty. This warranty covers only those pickups and accessories sold by authorized EMG Dealers. This warranty is not transferable.
