2 Volume (Independent)
1 Tone

INSTALLATION NOTES:

All EMG Active Pickups are compatible with each other. EMG accessories, the VLPF, EXG, SPC or RPC Controls can be added to any EMG System without requiring an extra battery. **DO NOT** reconnect the bridge ground wire, as EMG Active Pickups do not require string grounding. Use the 25K Ohm controls that are included for best results. If your output jack is a long panel style you will need to solder a stereo jack, like the SwitchCraft 152B or similar. Adjust the pickup level to the strings, and experiment with a distance that works for you. Alternate wiring diagrams are available at: emgpickups.com.

WARRANTY

All EMG Pickups and accessories are warranted for a period of two years. This warranty does not cover failure due to improper installation, abuse or damage. If upon examination the pickup is determined to be defective, a replacement will be made. Warranty replacement products are covered by this same warranty. This warranty covers only those pickups and accessories sold by authorized EMG Dealers. This warranty is not transferable.
